

Westlux Crystalline Powder

Description

- Westlux Crystalline Powder is a nano dispersed phylosilicate produced with special regard to the requirements of the building industry. Utilized in cement based systems this product shows excellent dispersibility. Additionally Westlux Crystalline Powder improves the workability properties of dry mix mortars significantly. The water resistance of renders or joint fillers can be increased and mortars remain longer protected of staining.

Application

Joint Fillers

Grouts

Renderers

Product Information

Colour		Light Grey
Form		Free Flowing Powder
Bulk Density	(g/l)	approx. 400
Sieve Residue	(63 µm)	max. 55%
pH Value	(2% solution)	Approx. 9 - 11
Moisture Content		Max 14%
Dosage		2Kg per Cubic Concrete (Cement 325kg)

Storage Stability:

12 Months if stored in dry, unopened, original packaging at temperatures between 0 and 40 degree Celsius.

Jl. Pergudangan Gedangan Permai B-8, Sidoarjo, East Java, Indonesia
